

Ansible Installation and Configuration

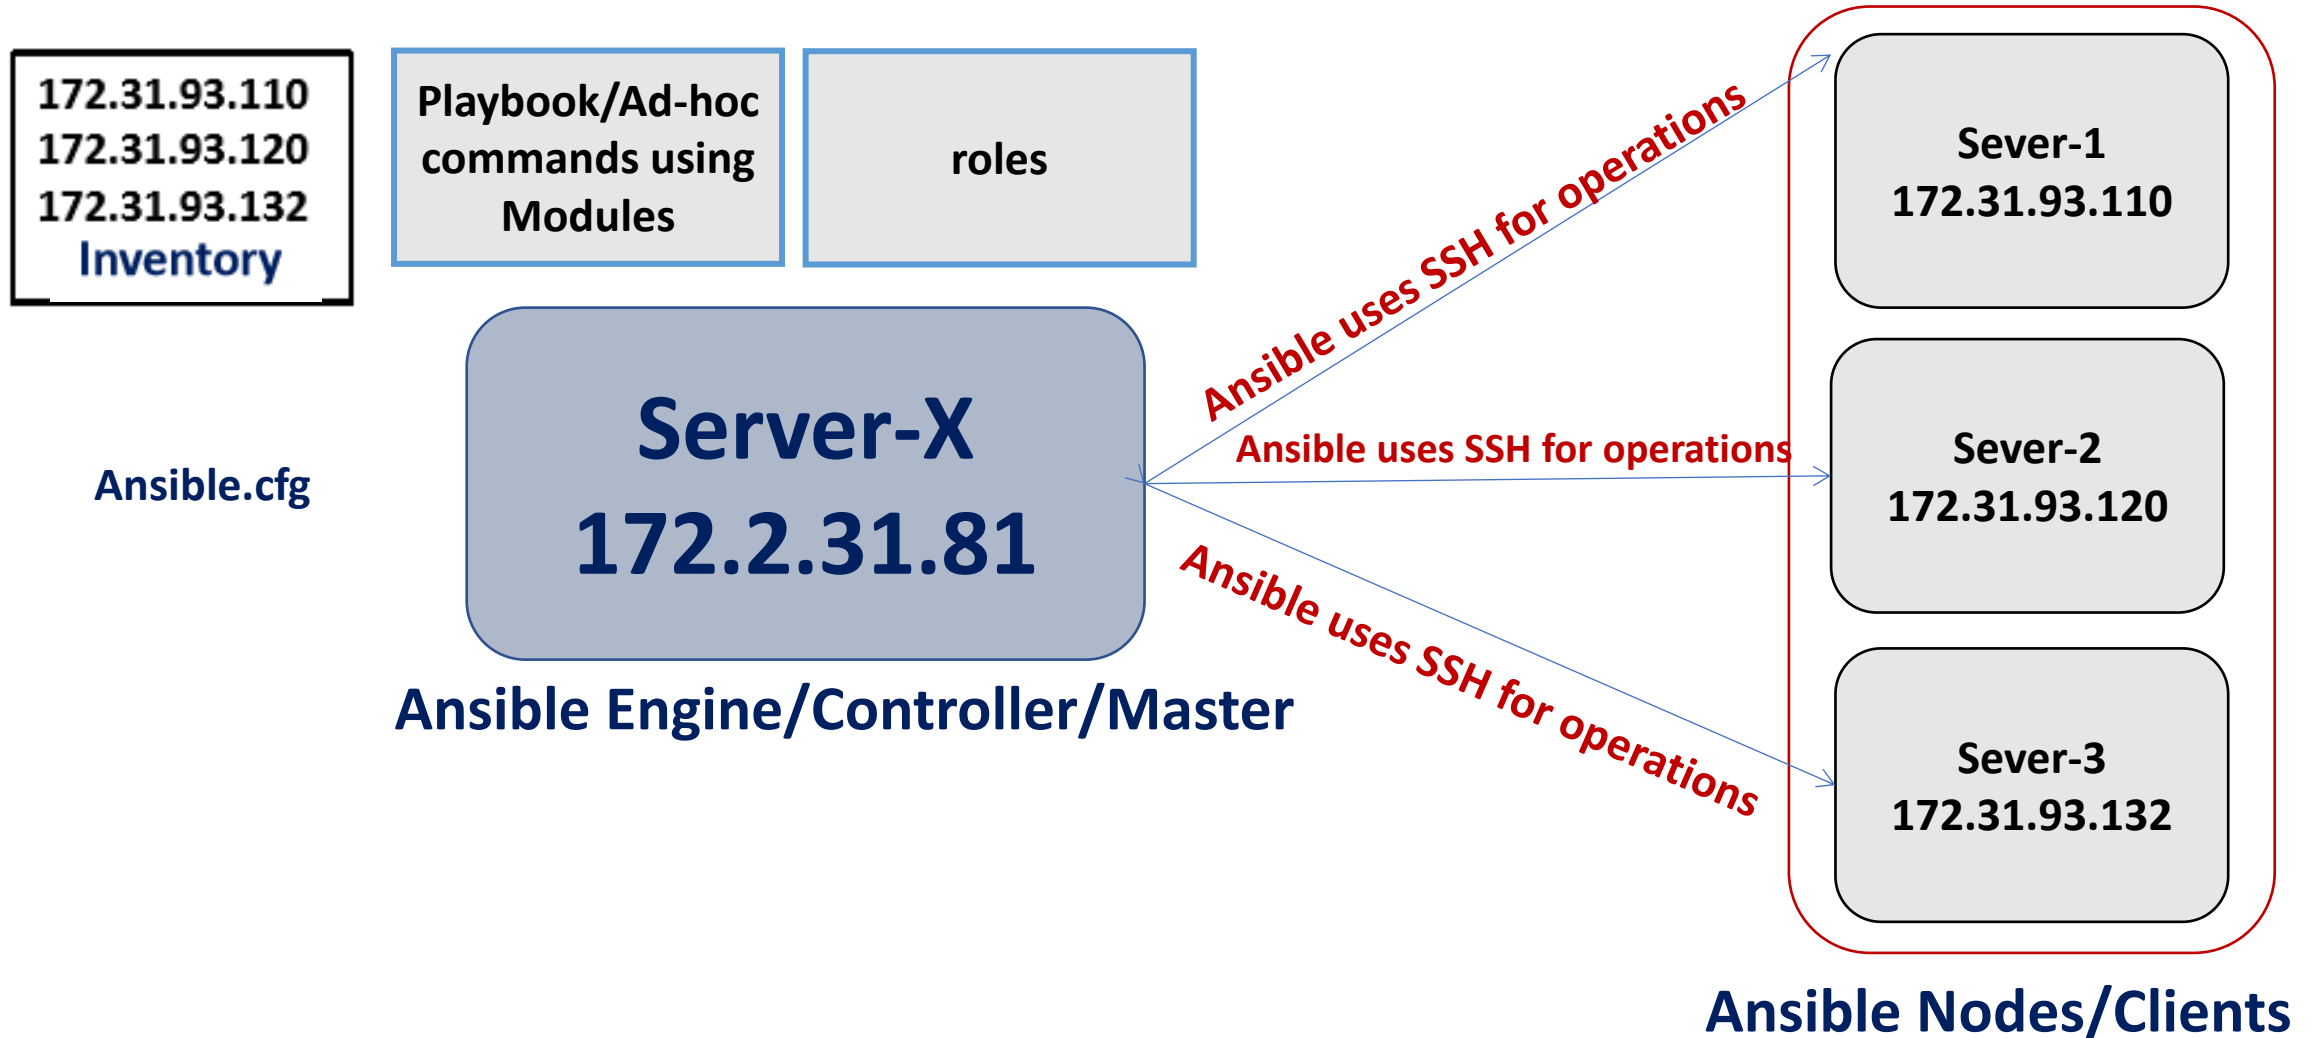

Part-1

Ansible

Automation with Ansible Playbooks

Ansible

Simple Ansible Architecture

Prerequisites for Ansible Engine/Control Node:

- **RHEL/CentOS/Debian/Ubuntu Linux with Python 2 (version 2.7) or Python 3 (versions 3.5 and higher) installed**
- **Windows isn't supported for the control node.**

Note: Ansible version 2.4 and later can manage earlier operating systems that contain Python 2.6 or higher.

- **We can install Ansible in three ways.**
 - Using yum
 - Using pip
 - Using compile file

Steps to Install Ansible on CentOS-7 using yum

➤ **Open** <https://docs.ansible.com>

Check for python version

Add epel

install ansible with

`yum install ansible`

Now verify ansible by running: `ansible --version`

Thank you
